GENERAL ELECTRIC (GE TRANSPORTATION)

contractor

Melbourne, Florida (USA)

Senior Software Engineer		2017 – 2018
<ul style="list-style-type: none"> Contributed to the implementation of AutoRouter, a software to route about half the American trains automatically, using Java, C++, and JavaScript. Increased the quality by introducing better code practices and automated testing. 		
EPSILON DATA MANAGEMENT	<i>employee</i>	Chicago, Illinois
Lead Software Engineer		2012 – 2016
<ul style="list-style-type: none"> Built and led a 9-people team to develop from scratch a critical web portal where our clients managed Tableau reports, accounts, files, downloads, and previewed and approved advertisements. The portal was slick, modern, responsive, and had OATH token single sign-on, thousands of automated tests, was built in a full JavaScript stack (Angular, Node.js, REST API, PostGres, LDAP, Couchbase), and continuous delivery. Managed 6 software engineers, from junior to senior level. Provided continuous mentoring, code reviews, weekly one-to-one, biannual performance evaluations, and career growth. Participated in the company's talent scouting and hiring. Performed 100+ job interviews. Business trip to California where I successfully managed a critical software aggregation with a sister company. As Sr Software Engineer: worked in a Scrum agile team to develop, in Java, SmartGWT, and SOAP, two major web applications for users to manage core business data. 		
NOKIA	<i>employee</i>	Chicago, Illinois
